

Saba's Panopto Connector

When you use the Panopto™ connector with Saba Cloud, you can easily add enterprise-quality video to your Saba development activities, opening up the world of video to all your learners.

FEATURES & BENEFITS

- Deliver learning content over video to reach a wider audience
- Add Panopto-based video as SCORM content in Saba's content inventory
- Add tracking and assessments to your Panopto videos for improved information retention and training
- SCORM packages will be downloaded from Panopto and will be stored on Saba's content repository
- Upload, delete, and edit videos uploaded to different content vendors

Enhance learning with the industry leader in enterprise video

Employees are 75% more likely to watch a video than read an email or memo. As a tool for learning, video is increasing in demand from learners and employees. Video can make training more versatile, events more accessible, and communications more engaging.

Enter Panopto and Saba. Saba is a worldwide leader in learning management systems, earning many top honors in the learning and development industry—year after year. Panopto is an industry-leading video platform for training, teaching, and presenting, allowing users to easily record video presentations, manage videos, and stream video content to any device. The two products are now integrated, using the Panopto Connector, available in the Saba Marketplace.

What can you do with the Panopto connector?

Once you connect Saba Cloud to Panopto with the Panopto connector on the Saba Marketplace, you can use enterprise-class video in many different classes, courses, assessments, and other applications within Saba. Automatically upload and update video content into the activity stream. Create video courses right in Saba Cloud using Panopto's video content. Combine the engagement of enterprise video with the tracking, learning, and assessment features of Saba to improve learning and retention—throughout your organization.

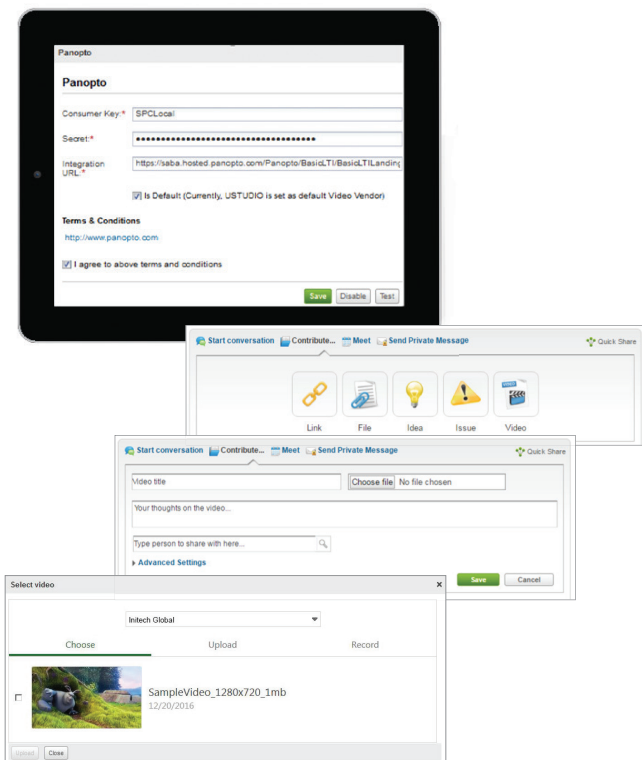

Use Panopto as an internal channel for all your organization's video content for sales enablement, corporate communications, online training, employee onboarding, executive messaging, and social learning. Record lectures, make course materials available on-demand to learners, broadcast organizational events, and more. The Panopto connector on Saba Marketplace allows you to use any and all Panopto-based video training with the powerful learning, tracking, and assessment features of Saba Cloud.

Features of the integration

With the connector enabled, Panopto's video content management system and Saba Learning work together to provide:

- **Single sign-on:** The username and password that employees use to sign in to Saba Learning will also automatically sign them into the VCMS. This ensures that employees can access videos without the need to remember and enter another set of credentials. It also simplifies access management for your IT staff.
- **Video embedding:** Learning and development teams can easily embed individual videos as well as video playlists into formal and informal learning activities throughout Saba Learning.
- **SCORM:** Panopto automatically passes the SCORM manifest to Saba Learning in order to track viewing and completion rates of learning video.

Opening the world of video in Saba Learning

By bringing together the broad e-learning capabilities of Saba with the video-specific functionality of Panopto, you and your team now have the tools you need to make video a central part of your employees' professional development. This opens new opportunities to use video at scale for both formal and informal learning activities, such as:

- Recording every ILT session for on-demand, anytime access
- Livestreaming training events to remote offices and employees
- Creating onboarding videos for new hires
- Capturing offboarding videos to preserve the knowledge of exiting employees
- Training sales reps through the use of recorded role-play exercises
- Exchanging employee insights through video-based social learning

More importantly, by integrating video into the core learning experience, you can provide employees with what they increasingly want—a more engaging medium to develop new skills, share best practices, and access learning content at the time of need from any device.

Conclusion

Whether Saba customers want the ability to easily record and share training videos with thousands of employees around the world, save time and money when capturing instructor-led training events, or provide employees with a searchable library of video learning content, Panopto can deliver enterprise-ready solutions for video-based Saba Learning customers. When businesses need an easy solution to record, manage, and share learning videos, they turn to Panopto—and now, through Marketplace, Saba Learning customers can harness the power of Panopto.
